Team "Hard To Cache"

Silas Erving: Research & Scorecard Lead

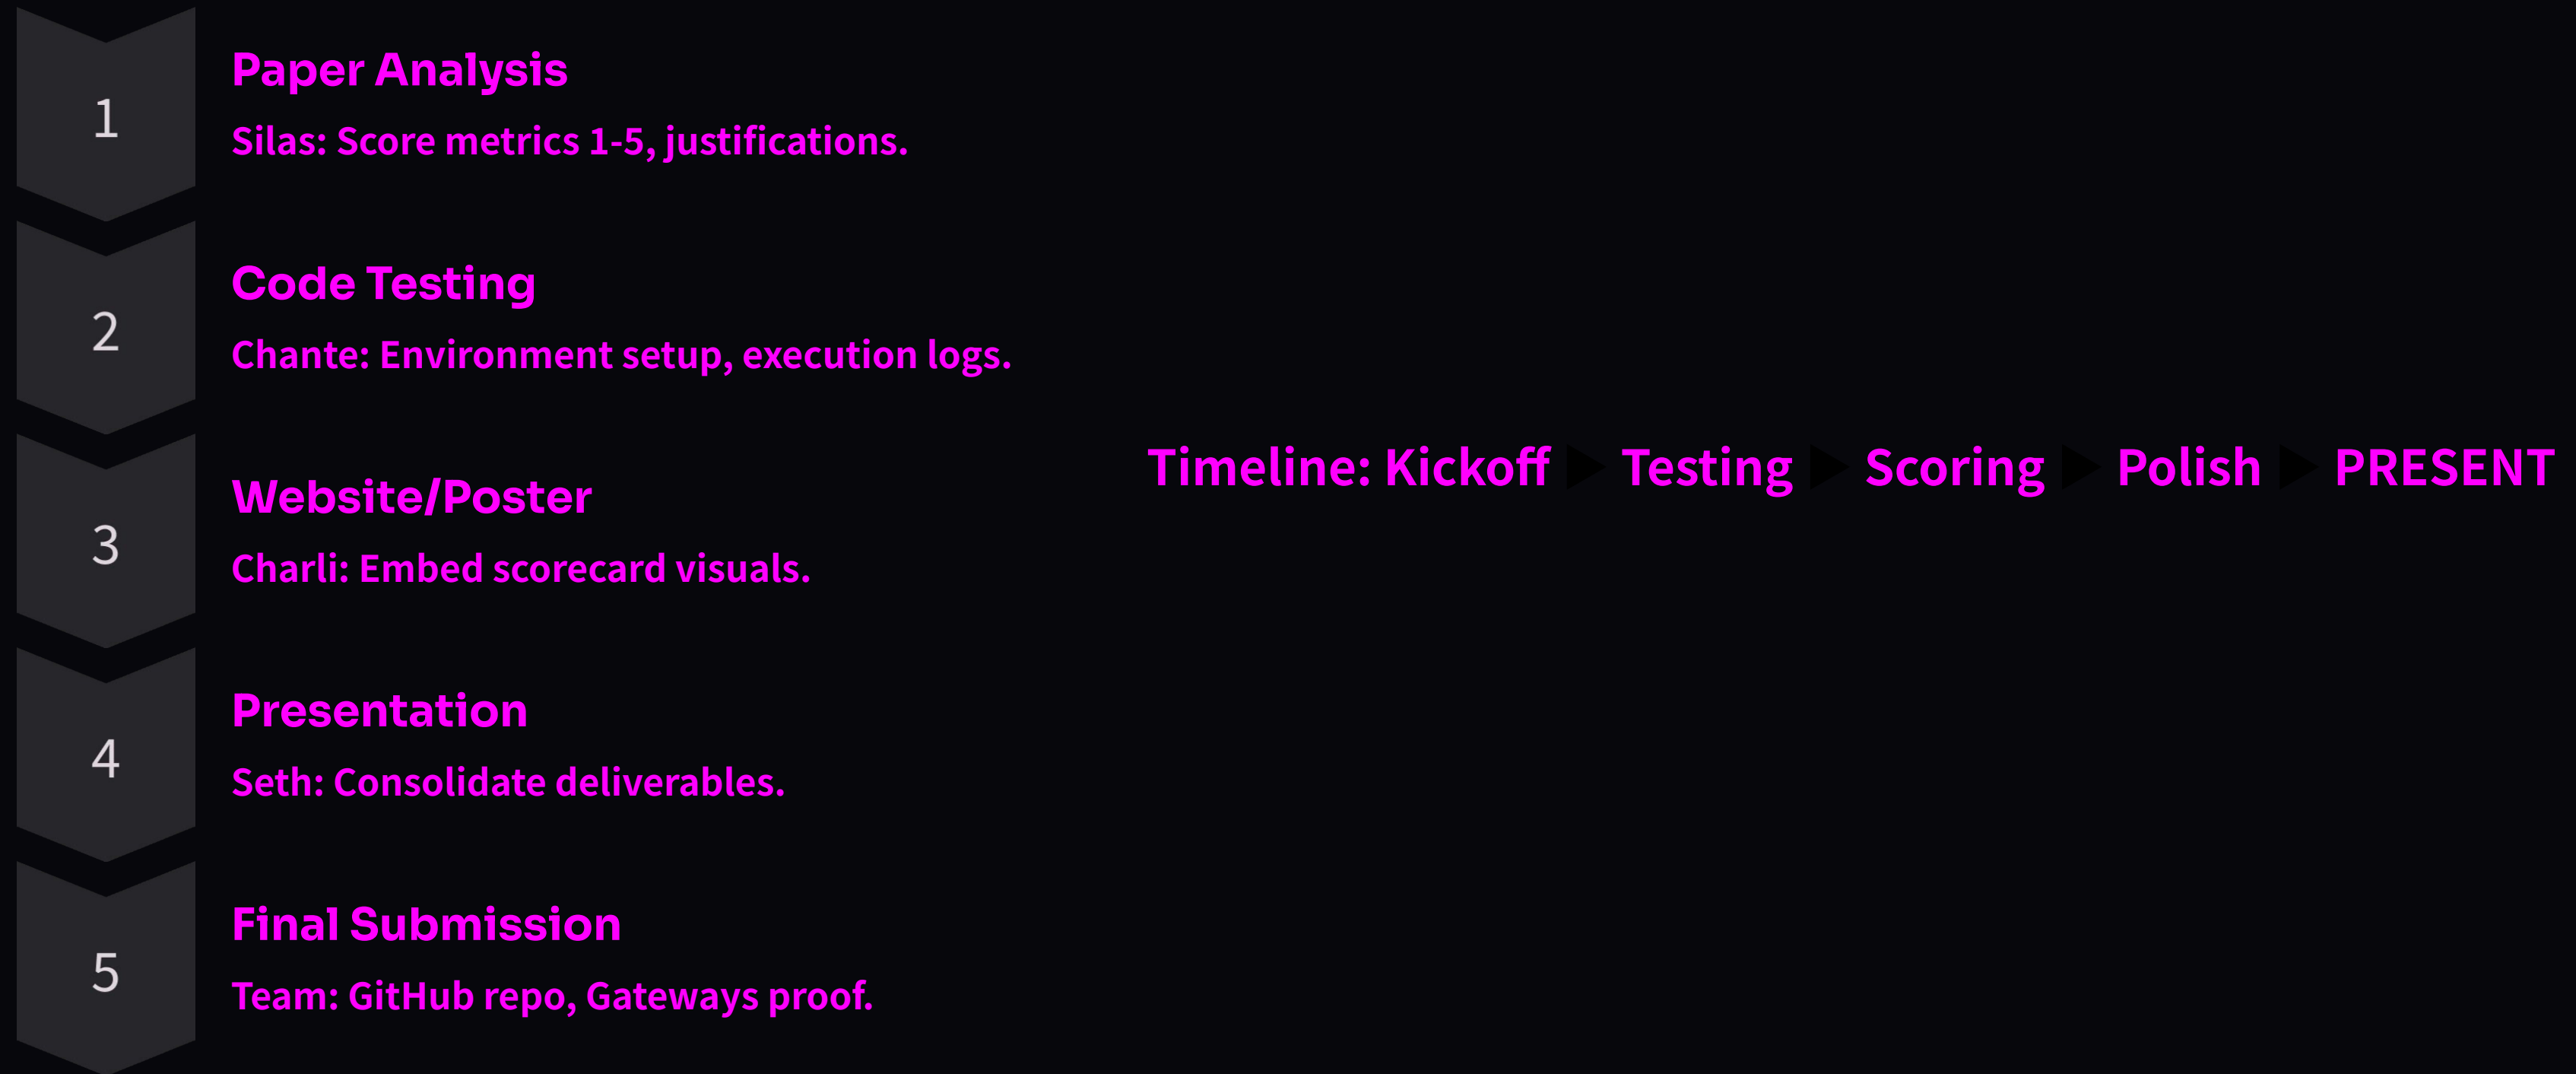

Chante: Code & Reproducibility Engineer

Charli: Web & Poster Designer

Seth: Presentation & Project Coordinator

Project Execution Plan

Evaluate reproducibility of 2023 ISCE + 2024 Supercomputing papers by June 27, 2025.

Charli – Web & Poster Designer

Role Focus: Craft the visual identity of our project across web and print platforms.

Core Responsibilities

- Design and launch a project website with embedded scorecard visuals
- Create a print-ready poster with aligned color scheme, font hierarchy, and content structure
- Collect and format team bios, photos, and profile links for inclusion
- Visualize and embed the Scorecard Prototype (see below) in both the website and poster
- Maintain version control and visual consistency across deliverables

Personal Timeline

DateTask

June 23

Attend kickoff, receive scorecard format & branding notes

June 24

Draft website layout, collect team photos and profile links

June 25

Design poster mockup, start embedding early scores and graphics

June 26

Finalize site and poster, QA design, ensure alignment with team plan

June 27

Support visual elements in final presentation and Q&A

Tools and Resources

PurposeTool(s)

Website: GitHub Pages, Terminal (Python3), HTML/CSS,
Google Sites

Poster Design: Canva or Google Slides (PDF export)

Visuals & Embeds: Google Sheets (scorecard
screenshots)

Team Info Collection: Google Forms or Google Docs

Day 2 Team Progress Check-In

Progress Priorities

- Set up program on Github/Collab for automation
- Further Develop GitHub HTML website
- Started to score metrics on our Scorecard sheet (finished 2 articles)

Updated Project Plan

- Priority shift to working on a web-scraping program
- Reorganized workflow to work in parallel

Day 2 Team Progress

Check-In

Technology/Resources in Use

- Compiled data from papers into readable content
- Created a path in Collab to scrape data
- Created HTML website on terminal with first stages of data scrape
- scoring metrics and summarizing each article through Google Sheets

Bottlenecks / Issues / Concerns

- Crashing my poor Macbook
- Apps stalling on Eureka/unable to handle data load
- Losing several SSH keys
- struggling to view some articles (limited access)

```
import pdfplumber
import pandas as pd

# Automatically use the uploaded file
pdf_path = list(uploaded.keys())[0]

with pdfplumber.open(pdf_path) as pdf:
    for i, page in enumerate(pdf.pages):
        print(f"\n📄 --- Page {i+1} Text ---")
        print(page.extract_text())

# Try extracting tables
tables = page.extract_tables()
for t_index, table in enumerate(tables):
    print(f"\n📊 --- Page {i+1} Table {t_index+1} ---")
    df = pd.DataFrame(table[1:], columns=table[0])
    print(df)
```
